*"A Better Garden Starts  
With A Better Plant"*

# SunSATIAS

*Floral accents  
for today's outdoor  
living areas*

*Nemesia Hybrids*

### INFO NOTE

**Key Benefits** A breakthrough in breeding, Sunsatias are truly accent plants for today's living. They will provide stunning winter colour in containers in modern patio gardens and outdoor living areas. Sunsatia combines the best attributes of different Nemesia species into one tremendous series that will change the way we consider this genus for evermore. Bred in Germany by crossing South African annual and perennial species, Sunsatia hybrids are distinctively different from traditional Nemesias. They produce more flowers, larger blooms, and flower for a longer period, and plants have greater vigour and an excellent branching habit. But above all they come in a range of previously unavailable colours. There are both vivid, luminescent bright colours and soft, subtle pastel shades.

**Planting** Sunsatias are ideal for container gardening and provide stunning floral accents in a large pot or in hanging baskets in the patio and courtyard. They will look fabulous planted in a single colour, a mixture of fruity colours or in combination with other plants. Use a premium potting mix. They can also be grown in the garden in well-drained soil. Sunsatias perform best in full sun in winter but will benefit from light shade with some protection from strong midday sun and hot winds as the weather warms up.

Within the Sunsatia series is a variety of growth habits. Upright forms are well suited to specimen planting in containers or as taller colour in combination planting. Spreading Sunsatias fill up a large pot or hanging basket giving a mound of coloured flowers for many months. Alternatively they can spill over the edge of combination planters. As a bonus, some varieties are scented.

**Care** Do not allow potting mix or soil to dry out. But avoid over-watering in order to prevent fungal disease in hot, humid weather. Regular light applications of liquid fertiliser will encourage blooming. Trim older flowers back to foliage to encourage branching and a longer flowering season.

**Awards** Sunsatias have received international accolades. The series was unveiled at the 2003 Chelsea Flower Show and every variety won a Royal Horticultural Society Silver Medal. Visitors expressed wonder at the intensity of the colours in the range. The series as a whole, as well as Sunsatia Coconut and Sunsatia Peach have won numerous awards at U.S. university trials.

**Sunsetia Blackberry**(D)

Taller upright variety; flowers have intense purple-pink rounded petals and an orange eye zone. 35 x 25cm.

**Sunsetia Coconut**(D)

The most compact of the trailing varieties with petite white flowers; heat tolerant; lightly fragrant. 20 x 30cm.

**Sunsetia Cranberry**(D)

Spreading with scarlet red flowers; sensational colour; cascading habit; best seller overseas; best in cooler locations. 25 x 30cm.

**Sunsetia Lemon**(D)

Spreading with large golden-yellow flowers; the other top seller overseas; also best in cooler locations. 25 x 30cm.

**Sunsetia Peach**(D)

Compact, densely branching upright variety with tight clumps of flowers in a cocktail of colours with hints of peach, cream, pink, orange and purple; lightly fragrant. 30 x 20cm.

Aussie Winners® Sunsatias™ will be available from good garden centres. Look for them in the distinctive aluminium-coloured pots printed with the AW logo.
